

# NICHE 125

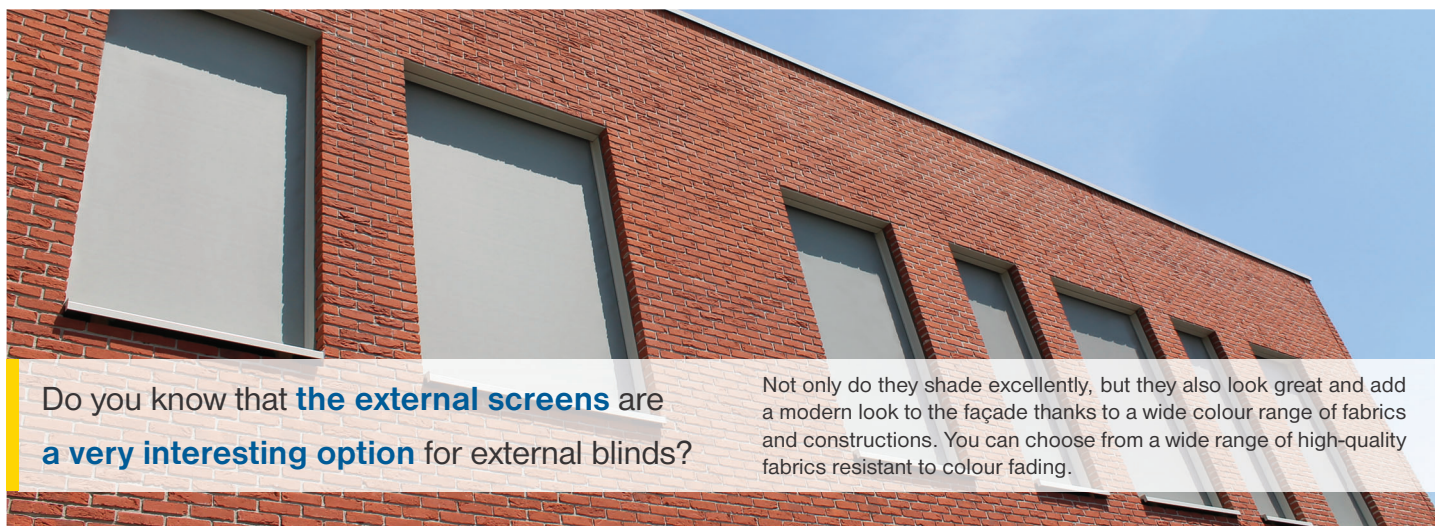

## BUILT-IN VERTICAL AWNING

- represents the trend in outdoor shading in the last few years
- excellently shades and adds a modern look to the façade at the same time
- to increase the wind resistance it uses a zip that is welded to the fabric sides
- a wide range of systems available in several colours
- a choice of perforated fabrics (with holes) that enable a contact with the surroundings even when the awning is pulled out
- with a suitable fabric it makes the interior totally blackout
