Do you know that **insect screens are the most effective protection** against insects?

Let a window or a balcony door open at night - you do not have to worry about mosquitoes if you have insect screens! There will be no gap in your windows and doors through which the annoying insects can enter your home.

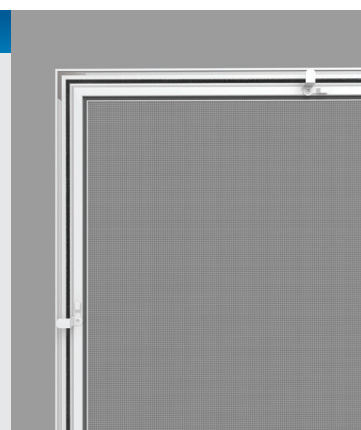

INSECT SCREEN EXT-10

- » extruded profile 26 × 9 mm
- » corner of the frame cut at 45° with stainless steel reinforcement
- » fixation of the screen to the window frame using turning hooks
- » with integrated sealing brush in the groove

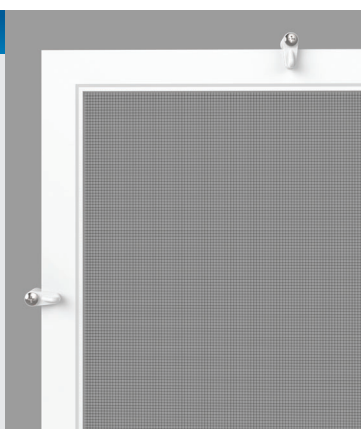

INSECT SCREEN EXT-16

- » extruded profile 32 × 9 mm
- » corner of the frame cut at 45° with stainless steel reinforcement
- » fixation of the screen to the window frame using turning hooks
- » with integrated sealing brush in the groove
- » also suitable for windows with a distinctive rounding of the window frame

INSECT SCREEN 25 mm

- » extruded profile 25 × 11 mm
- » type of frame corner: visible plastic or cut at 45° with plastic reinforcement
- » optional fixation of the screen to the window frame using: swivels, spring pins, Z-brackets or springs
- » can be made with an adhesive sealing brush

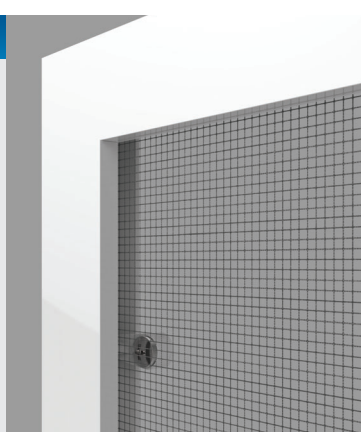

INSECT SCREEN 36 mm

- » extruded profile 36 × 11 mm
- » corner of the frame cut at 45°
- » fixation of the screen to the window frame using Z-brackets or swivels
- » with sealing brush in the groove, or with side brush
- » massive frame with great stability
- » also suitable for aluminum windows

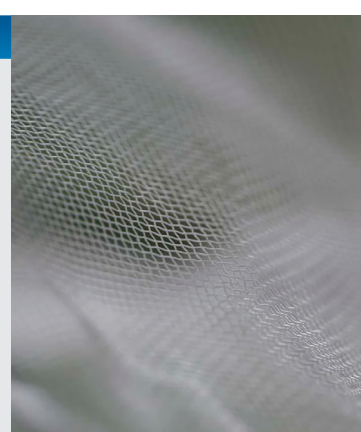

OFFSET INSECT SCREEN

- » extruded profile 24 × 24 mm
- » corner of the frame cut at 45° with stainless steel reinforcement, or outer visible plastic corners
- » fixation of the screen to the window frame using swivels
- » suitable for windows requiring the offset of the screen due to overlapping drip-mouldings or handles

MESH

- » made of fiberglass which does not corrode and tolerates temperature differences
- » for an extra charge you can choose reinforced or anti-allergic mesh
- » you can choose from black, grey or transparent mesh
